- Business transformation
- Change management
- Lean management
- AGILE & SCRUM methodologies

Key expertises

Distributed ledger technologies, smart contracts. Business Process Management, Standardisation, Mining, Automation & Optimisation.

Jimmy Goossens

Unlocking the power of distributed ledger technologies

I am passionate about innovation and driven by the desire to find new things to improve my daily life and that of others.

I always attach great importance to understanding the different stakeholders involved with the product I develop. I develop to provide them with a product that will best meet their expectations as well as providing a practical solution to my clients' problems.
